

Introduction to Computer Science (MAC 101)

Professor: Andi Toce

Homework 2

Due Wednesday, October 12 via email

Assignment

Write a program that prints the shape shown below. You may use output statements that print either a single asterisk (*) or a single blank. Maximize your use of repetition (with nested **for** or **while** structures) and minimize the number of output statements.

Output

```
*****
*****
*****
*****
*****
*****
*****
```

Note: The output should look exactly as shown the example above

How to submit

Save the file as LastName.FirstName.HW2.cpp

E-mail me the file by the due date. Late submissions will **NOT** be accepted

Grading

Correctness – 50%

Efficiency – 30%

Code style and appearance – 20%
